• Windows, Windows Server, Android, ChromeOS

## **NETWORKING:**

Design, configuration, and troubleshooting of LAN, WAN, Cloud, and Wireless systems

## **PROGRAMMING LANGUAGES:**

• C#, Java, Python, SQL, Javascript, Android Development

#### **WEB DEVELOPMENT:**

• HTML, HTML5, CSS, Javascript, Bootstrap, Python-Flask, node.js, React

## **DATA SCIENCE AND STORAGE:**

• JSON, XML, MySQL, SQL Server, SQLite

#### **DEVELOPMENT MANAGEMENT TOOLS:**

• Git, GitHub, Jira, Confluence

#### **CONTENT CREATION TOOLS:**

• Gimp, Adobe Photoshop, Adobe Illustrator, OBS, Snagit, Microsoft Office

## **HARDWARE/SYSTEMS:**

PC, Cloud, VPN

## **EMERGING TECHNOLOGIES:**

• Virtual reality, blockchain, AI agents, AI API's

## **EDUCATION & CERTIFICATIONS**

**Dev10** *Java Full Stack Developer Course* 

**Google IT Certification Course** 

Certificate of Completion

Lewis University
Bachelor of Elective Studies

Milwaukee, WI

December 2021

Online March 2021

Romeoville, IL

May 2020

GPA 3.71 Cum Laude

## **PROJECTS**

## **Yugioh Burn Deck Practice Tool: Personal Project**

• Designed a practice tool to help members of my online group that I moderate improve their skills with a specific deck type. It demonstrates basic use of javascript and CSS to present a solution.

## **Portfolio Website: Personal Project**

• Created a personal website at <a href="www.1313jfun.com">www.1313jfun.com</a> to host my personal projects, and serve as a starting point to make new connections.

## Runner (Messaging/Meetup App): Capstone Project at Dev10

With a team, we developed a mobile application with a database for runners to meetup and go on runs together in 2 weeks. We utilized React, MySQL, and Java to create a full stack application and organized our project using Github. We had to present the project to prospective clients to demonstrate not only what we learned in our time together, but also show our collaborative skills.

#### **Fishing Assistant: Personal Project**

• Currently designing a fishing/weather app that gives detailed weather information that is relevant to Anglers. Utilizing API's, it currently supports weekly, hourly, barometric, moon phases, and severe weather alerts.

## TGW Group

## **Grand Rapids, MI**

Commissioning Engineer December 2024 - Present

- Demonstrated emulation tools to testing, commissioning, and development teams
- Executed integration test plans, ensuring software and equipment functioned as expected by running and analyzing test scripts
- Participated in software functional testing using emulation models to verify performance and functionality
- Commissioned software on-site, integrating it with material handling equipment
- Contributed to on-call rotation, addressing urgent technical issues and ensuring system uptime
- Developed automation test scripts to enhance testing efficiency and coverage
- Gained hands-on experience in distribution center operations and material movement processes

#### THATCHER TECHNOLOGY GROUP

Naperville, IL

Software Configuration Specialist

May 2023 - March 2024

- Assisted customers and team members in identifying errors, solutions, and areas for improvement in software products
- Used C#, SQL, JavaScript, CSS, and PowerShell scripts
- Worked in environments including Visual Studio Cron, Visual Studio Code, SQL Server Management Studio (SSMS), and Amazon S3
- Performed daily interactions with clients to identify and resolve warranty issues
- Collaborated with Project Managers from other departments to resolve tasks
- Assisted in onboarding new employees with extensive shadowing opportunities
- Actively participated in department meetings to identify improvements

THORNBERRY LTD

Lancaster, PA

Junior Software Engineer

February 2022 - October 2022

- Developed and managed software handling Protected Health Information (PHI) using ObjectScript, SQL, and JavaScript
- Collaborated with various departments to develop customer solutions
- Worked closely with the Lead Developer for approval of requested changes
- Identified customers' IT needs and provided effective solutions
- Achieved successful project management through careful planning, effective communication, and agile methodologies
- Maintained software help desk, providing timely and effective customer assistance
- Attended and coordinated collaborative sessions with coworkers to foster open communication

GENESIS 10 Milwaukee, WI

Software Developer

September 2021 - November 2022

- Created successful programs in Java, SQL, and JavaScript
- Used REACT API and cached data using HashMap
- Achieved title of Junior Developer after a four-month intensive program
- Code reviewed and tested using Spring
- Used GitHub for independent and group projects
- Identified and addressed COVID-related challenges
- Developed collaborative skills for remote and on-site assignments
- Attended team-building exercises
- Established relationships with coworkers to build a network of connections
